Free AI Training Resources

AI Governance, Ethics, and Responsible Use

This is a list of free resources on AI governance, ethics, and responsible use training. Every program below is available at no cost, and several award a badge or certificate. Select any program name to open it.

Program	Cost	Why It Matters
Microsoft: Embrace Responsible AI Principles & Practices	Free	Covers six principles: fairness, reliability and safety, privacy and security, inclusiveness, transparency, and accountability
Microsoft: Apply Responsible AI Principles in Learning Environments	Free	Built for higher education educators and school leaders who implement or build AI responsibly in a learning environment
Google: Introduction to Responsible AI	Free + badge	A short course on what responsible AI is, why it matters, and how Google applies it in its products
Anthropic Academy: AI Fluency for Educators	Free + certificate	For educators, instructional designers, and educational leaders applying AI Fluency to teaching and institutional strategy
University of Helsinki: Ethics of AI	Free	Developed with the cities of Helsinki, Amsterdam, and London; covers accountability, transparency, human rights, fairness, and ethics in practice
Linux Foundation: Ethics in AI & Data Science (LFS112)	Free + Credly badge	Covers business drivers, ethical challenges, societal impacts, and strategies for ethical implementation
PMI: Free Introduction to CPMAI	Free (earns PDUs)	A preview of the PMI-CPMAI certification that introduces AI project management and the CPMAI methodology
ForHumanity University (AI audit courses)	Courses free; certification exam has a fee	Trains auditors on EU AI Act criteria developed through its work with CEN/CENELEC JTC 21

Before You Start

- Pick one and finish it. The Microsoft and Google modules are the shortest entry points.
- Course length varies widely, from short modules to multi-week courses. Check the time estimate before enrolling.
- Save every badge or certificate you earn for your professional portfolio.
