DRAFT SPEAKER SHEET · PROPOSED TOPICS · PENDING OWNER APPROVAL

Dr. Naketa Jones, EdD

Founder & Principal Consultant
Ethical AI Solutions

An ethics-led perspective on AI, learning, and human judgment.

20+ years in business and workplace ethics

ABOUT DR. JONES

Dr. Jones brings more than two decades of business and workplace ethics research and practice to responsible technology conversations. Her research focuses on ethical accountability in employee selection tools, algorithmic systems, and AI governance. As a professor and Senior Instructional Designer at Baker College, she connects educational leadership and instructional design with practical questions about learning, work, and human judgment.

ACADEMIC GROUNDING

EdD: Doctor of Education in Educational Leadership, Bowling Green State University.
MPA: Master of Public Administration.

PROPOSED TALK TOPICS

Starting points for a planning conversation, not a record of past talks.

Human judgment in an AI-influenced world
Explore accountability, bias, and the questions to ask before relying on an AI-supported recommendation.
Suggested audience: Education, nonprofit, public-sector, and workplace learning teams.

Learning that makes reasoning visible
Consider assignments and assessments that strengthen critical thinking and purposeful AI use without replacing independent judgment.
Suggested audience: Faculty, instructional designers, and teaching and learning leaders.

From workplace ethics to responsible AI practice
Connect business and workplace ethics questions to employee selection tools, algorithmic systems, and organizational AI use.
Suggested audience: Organizational leaders, HR teams, and workforce educators.

Proposed formats: Keynote conversation, interactive workshop, or panel discussion. Topic, format, audience fit, availability, and fee require written confirmation.

Tell us about your audience.
An inquiry is not a confirmed booking.
